Membuat Halaman Users

```

1 "use client";
2
3 import React, { useState, useEffect } from 'react';
4 import axios from 'axios';
5
6 export default function LoginPage() {
7   const [users, setUsers] = useState([]);
8   const [loading, setLoading] = useState(true);
9
10  useEffect(() => {
11    fetchUsers();
12  }, []);
13
14  const fetchUsers = async () => {
15    try {
16      const token = localStorage.getItem('token');
17      // Pastikan endpoint ini sesuai dengan backend Anda
18      const response = await axios.get('http://localhost:3001/api/users', {
19        headers: { Authorization: `Bearer ${token}` }
20      });
21      setUsers(response.data.data);
22      setLoading(false);
23    } catch (error) {
24      console.error('Gagal mengambil data user:', error);
25      setLoading(false);
26    }
27  };
28
29  const handleDelete = async (id) => {
30    if (window.confirm('Apakah Anda yakin ingin menghapus user ini?')) {
31      try {
32        const token = localStorage.getItem('token');
33        await axios.delete('http://localhost:3001/api/users/' + id, {
34          headers: { Authorization: `Bearer ${token}` }
35        });
36        alert('User berhasil dihapus!');
37        fetchUsers(); // Refresh data tabel
38      } catch (error) {
39        alert('Gagal menghapus user!');
40      }
41    }
42  };
43
44  return (
45    <div style={{ padding: '20px' }}>
46      <h2 style={{ font-size: '24px', fontWeight: 'bold', marginBottom: '16px' }}>Manajemen Pengguna (Users)</h2>
47      <loading ? <p>Memuat data...</p> :
48      <table border="1" style={{ width: '100%', borderCollapse: 'collapse', textAlign: 'left' }}>
49        <thead>
50          <tr style={{ backgroundColor: '#f3f4f6' }}>
51            <th style={{ padding: '12px', borderBottom: '1px solid #ddd' }}>ID</th>
52            <th style={{ padding: '12px', borderBottom: '1px solid #ddd' }}>Username</th>
53            <th style={{ padding: '12px', borderBottom: '1px solid #ddd' }}>Email</th>
54            <th style={{ padding: '12px', borderBottom: '1px solid #ddd' }}>Status</th>
55            <th style={{ padding: '12px', borderBottom: '1px solid #ddd' }}>Aksi</th>
56          </tr>
57        </thead>
58        <tbody>
59          <{users.map(user) => (
60            <tr key={user.id} style={{ borderBottom: '1px solid #ddd' }}>
61              <td style={{ padding: '12px' }}>{user.id}</td>
62              <td style={{ padding: '12px' }}>{user.username}</td>
63              <td style={{ padding: '12px' }}>{user.email}</td>
64              <td style={{ padding: '12px' }}>{user.is_active ? 'Aktif' : 'Non-Aktif'}</td>
65              <td style={{ padding: '12px' }}>
66                <button
67                  onClick={() => handleDelete(user.id)}
68                  style={{ backgroundColor: '#f44444', color: 'white', padding: '6px 12px', border: 'none', borderRadius: '4px', cursor: 'pointer' }}
69                >
70                  Hapus
71                </button>
72              </td>
73            </tr>
74          </>
75          </tbody>
76        </table>
77      </div>
78    );
79  };
80
81 </>
82 </>

```

Proteksi Halaman Auth (Redirect)

```
1 "use client";
2
3 import { useEffect } from "react";
4 import { useRouter } from "next/navigation";
5
6 export default function SignInPage() {
7   const router = useRouter();
8
9   useEffect(() => {
10     const token = localStorage.getItem("token");
11     if (token) {
12       router.push("/cms");
13     }
14   }, [router]);
15
16   return (
17     <div>
18     </div>
19   )
20 }
```

Output
